

HPotter Senior Project Tips

This is a short document containing some tips, compiled by the class before you, to maybe make your life a bit easier.

1. There is a discord server for Hpotter Senior Projects: <https://discord.gg/6zjxHCg>
This'll allow you to both stay in contact with each other, and ask questions of people who used to work on Hpotter. We suggest you make every member of your team join it.
2. Get to work early, and get to work fast. There is more work than you'd think to actually finish, and wasting the entire first sprint doing nothing meant we were panicked towards the end.
3. We have left a Jira board, containing many things that can be focused on early on.
4. Your Scrum Master has to submit a timesheet at the end of every sprint. Make sure your times are on it!
5. There is a powerpoint template customized for Hpotter, should you choose to use it:
